

Workshop:

Environmental technology verification (ETV) as a tool facilitating implementation of innovative technologies for energy efficiency improvement at wastewater treatment plants

Date: 23 October 2017

Venue: Aquateam COWI, Karvesvingen 2, Oslo, Res_Room_NOOSL_2018

AGENDA

12:00	Registration and welcome coffee
12:30 – 12:40	Opening comments and short presentation of the ETV4Water project <i>Izabela Ratman-Kłosińska, Project Coordinator, ETV Body, Institute for Ecology of Industrial Areas, Katowice Poland</i>
12:40 – 13:00	Improving energy efficiency of a wastewater treatment plant thanks to innovations <i>Beata Szatkowska, Aquateam COWI, Norway</i>
13:00 – 13:30	Environmental Technology Verification (ETV) as a tool providing credible, market-useful information on the performance of innovative environmental technologies <i>Izabela Ratman-Kłosińska, Project Coordinator, ETV Body, Institute for Ecology of Industrial Areas, Katowice Poland</i>
13:30 - 14:00	How to define performance parameters for verification including parameters relevant for energy efficiency of a wastewater treatment plant <i>Ewa Neczaj, Chief Verification Expert, ETV Body, Institute for Ecology of Industrial Areas, Katowice Poland</i>
14:15 – 14:30	Discussion and wrap-up
